

Repair Specs:

To Who it may concern

Rhino has Body and chassis dimensions and panel gaps only, there No body repair specifications.

G4 Rexton has body and chassis dimensions and panel gaps No body repair specifications

Actyon Sports II has body dimensions and chassis dimensions but no body repair specifications

Korando has both body major components manual and body gaps but only in basic form but no Body repair specifications

Tivoli has body dimensions and panel gaps but no body repair specifications

Stavic II has Body dimensions, major components and dimensions but has no body repair specifications

Everything else is just body gaps

Please note that None off the Ssangyong range has Body repair workshop style manuals that show a panel shop how to replace all major body panels and there is no cut and repair options

The Body manuals are all in the workshop e-manuals in SIW under the body section and can be accessed through your local Ssangyong service agents, these only show body gaps and in some cases spot weld points and material used.

All repairs to Ssangyong products are to be done to Best Trade Practices
